Deploying Expo App

Using Expo Publish

Prerequisites

- Ensure you have an Expo account
- Expo CLI installed globally: npm install -g expo-cli
- Make sure your app is ready for deployment (tested and finalized)

Deployment Steps

1. Log in to Expo Account

Run expo login in your terminal

Enter your Expo account credentials

2. Navigate to Project Directory

Open your terminal

Navigate to the directory of your Expo project

3. Publishing

Run expo publish in the terminal

Expo CLI will start building your project

4. Wait for Completion

Wait for the build process to finish

Expo will provide you with a published URL
